

Alex Tokhirjonov

FULL STACK & DEVOPS ENGINEER

010-2076-7640 · mntokhirjonov@gmail.com · Seoul, South Korea
tokhirjonov15.github.io/portfolio · github.com/Tokhirjonov15

Full Stack engineer running a production medical-tourism platform in Seoul — web, mobile app and admin dashboards serving international patients in 7 languages, with card payments, push notifications and AWS serverless infrastructure. Comfortable owning a product end to end, from database schema to App Store build, and working day-to-day in Korean with clinics, payment providers and regulators. Background in computer vision and LLM-based systems.

WORK EXPERIENCE

Full Stack & DevOps Engineer — MeFlow Co., Ltd., Seoul May 2026 – Present

- Build and operate **Seoul Gijibae** (seoulgijibae.com) — a medical-tourism platform for international patients: Next.js web, React Native/Capacitor app and three role-based admin dashboards, localized into 7 languages.
- Integrated **Eximbay international payments** end to end: reservation-deposit model, tiered refunds, server-side verification and multilingual push notifications (OneSignal).
- Run **AWS serverless** infrastructure (Lambda, API Gateway) deployed with SST; PostgreSQL on Supabase with Drizzle ORM and tRPC; CI/CD via GitHub Actions and Vercel.
- Own SEO and analytics: a 17,000-clinic public directory with structured data and hreflang, plus GA4 event instrumentation across web and app.

Full Stack & DevOps Engineer — Digital City IT Center, Andijan Sep 2025 – Feb 2026

- Developed and deployed web applications with React, Node.js, NestJS and MongoDB; GraphQL APIs with Apollo Client.
- Designed RESTful services in an MVC architecture and maintained a production monorepo with npm/Yarn workspaces.

Backend & Frontend Developer — DataSite Technology, Tashkent Feb 2023 – Aug 2025

- Built GraphQL APIs and optimized backend performance with Express and Next.js; multilingual UIs with react-i18next.
- Implemented authentication and session handling (JWT, bcrypt); interactive 3D/animation work with Three.js.
- Shipped a real-time object-detection system with OpenCV and PyTorch, served through FastAPI.

TECHNICAL SKILLS

FRONTEND	React, Next.js, React Native (Capacitor), TypeScript, Redux, Tailwind CSS, Three.js, Framer Motion
BACKEND	Node.js, NestJS, tRPC, Express, GraphQL (Apollo), PostgreSQL (Drizzle, Prisma), Supabase, MongoDB, Redis, FastAPI
CLOUD / DEVOPS	AWS (Lambda, API Gateway), SST, Vercel, Cloudflare, Firebase, Docker, Nginx, GitHub Actions, Linux
PRODUCT	Eximbay payments, OneSignal push, OAuth (Google / Apple / LINE), i18n (7 languages), Google Analytics 4, Search Console
AI / ML	PyTorch, OpenCV, Hugging Face, LLM fine-tuning (LoRA), RAG, Qdrant, YOLO

EDUCATION

Kangwon National University — B.S., AI Software & Global Human Resources Mar 2021 – Aug 2025

- Bachelor's thesis: "Real-time Object Detection".
